SKILLS

- **Programming Languages** : Javascript, C, C++, Java, HTML, CSS, TypeScript
- **Libraries and Frameworks** : Node.js, Express.js
- **Tools** : AWS, Microservices, CI/CD, MongoDB, PostgreSQL, MySQL, Git, Docker, REST API, postman, JIRA

EXPERIENCE

Backend Developer

Jan 2025 - Present

Mindstix Software Labs Pvt. Ltd

- Developed and maintained REST and GraphQL APIs (via a BFF layer) across **9+ microservices** for FFVV by Belcorp and Amway Promotion Management platforms.
- Designed and implemented scalable backend services using NestJS, Spring Boot, MongoDB, and SQL, ensuring reliable and performant application behavior across both platforms.
- Improved API response times by up to **60%** through database indexing, query optimization, N+1 resolution, and Redis caching strategies.
- Collaborated with cross-functional teams to translate business requirements into technical solutions, delivering **70+ backend features/APIs** across project releases.

Software Intern

Sep 2023 - Oct 2023

Centregade Labs Pvt. Ltd

- Contributed to a JavaScript-based full-stack project with a focus on backend tasks using Node.js and API debugging.
- Fixed bugs and optimized existing REST APIs, improving performance and reliability by **20%**.
- Restructured backend code for better readability, maintainability, and adherence to coding standards.
- Maintained and updated Confluence pages for project documentation, including API specifications.
- Gained practical exposure to debugging techniques, code optimization, and clean architecture principles.

PROJECTS

FFVV, Belcorp

- Sales enablement tool for a multinational beauty brand in Latin America (Belcorp), helping manage consultants and their hierarchy through an Android application.
- Architected and developed the backend from scratch using NestJS, building REST and GraphQL APIs across **5 microservices** in a microservices architecture.
- Implemented **JWT**-based authentication with access and refresh tokens, and ensured **idempotency** for critical operations to maintain data consistency across services.
- Resolved N+1 query issues, improving query performance by **60-70%**, and introduced **Redis caching** for frequently accessed data, reducing response times by **50%**; used SQL stored procedures for complex data operations.
- Deployed and scheduled services using **AWS Fargate** with rate limiting for API stability; monitored application health with **New Relic** and enforced code quality standards with **SonarQube**.
- Key Skills: NestJS, TypeScript, MongoDB, SQL, GraphQL, REST APIs, Microservices, JWT, Redis, AWS Fargate, New Relic, SonarQube.

Amway Promotion Management (APM)

- Enterprise-scale promotion management platform developed for Amway, enabling users to create, manage, approve, and track promotional campaigns across multiple markets and regions.
- Architected and developed **4 microservices**, implementing configurable approval workflows across multiple business stages with role-based access control (RBAC) for secure, authorized operations.
- Integrated **Okta** for authentication/authorization and **Secrets Manager** for secure credential management, strengthening security compliance across services.
- Resolved N+1 query issues and optimized DB queries, improving API response times by **40-50%**; refactored data transformation logic to speed up heavy-payload endpoints by **30%**.
- Implemented **WebSocket-based** auto page refresh, eliminating manual refreshes for end users, and introduced asynchronous processing that reduced blocking operations, improving overall system throughput by **25-30%**.
- Conducted root cause analysis (RCA) on recurring production issues and implemented logging and monitoring with **Dynatrace**.
- Key Skills: NestJS, Node.js, Spring Boot, TypeScript, Java, REST APIs, Microservices, MongoDB, SQL, Okta, Dynatrace, WebSocket, Secrets Manager.

EDUCATION

Symbiosis Institute of Technology, Pune

2025

B.Tech

Computer Science and Engineering - 8.4 GPA
